

Dear colleagues!

Unfortunately, as the author, I do not have the right to write a positive review of this monograph, despite our very great desire. I will only note that we managed to develop a significantly reduced version of this work. To do this, we had to use some trick not from pure mathematics, but from the field of programming. At the same time, we corrected two inaccuracies in the monograph. The link for the new abridged version in English is as follows:

<file:///C:/Users/User/Desktop/Graph5.pdf>

With deep respect

author
